Education

MPH in Epidemiology & Environmental Health

Emory University (Expected May 2026)

B.S. in Physiology

University of Washington (June 2024)

Data Science Certificate (Expected May 2026)

Skills:

- Statistical Programming: R (ggplot2, tidyverse, tmap, shiny, raster, terra, qgcomp), SAS, SPSS, and Python.
- Data Visualization: Tableau, R Shiny, Power BI
- ArcGIS
- Data Management: Excel, Google Sheets, SQL, and Stata
- Survey Design: REDCap and Qualtrics
- EMR Systems: OncoEMR, EMOL
- Languages: English, Tamil, Spanish, and Urdu.

Experience:

Environmental Health and Epidemiology Research Assistant – Michigan PBB Registry

March 2025-Present

- Research Michigan residents that were exposed to the PBB-153 contamination event in 1973
- Analyze comprehensive health survey of PBB related health conditions that have not been studied yet in R
- Clearly communicate with study participants via email and focus groups
- Developed database of health concerns from all community meetings from 2011 to present
- Prepared focus group recruitment, discussion guide, and consent documents for IRB approval
- Conducted a literature review of endocrine disrupting chemicals' effects on mental health
- Analyzed prevalence of mental health conditions among PBB cohort and their associations with PBBs and PCBs exposure
- Investigating association between ovarian cyst prevalence and PCBs and PBBs levels in reproductive aged women

Data Visualization Summer Assistant – John Hopkins University ARC Lab

May 2025-August 2025

- Mapped the current state of famines in 22 countries using the Integrated Food Security Phase Classification system
- Visualized famines in 22 countries using ICP data and R shiny application, hosted on shinyapps.io
- Mapped phase populations, provinces, and current IPC data, four-month near-term projections, and eight-month medium-term projections: <https://fewsnet.shinyapps.io/data/>

Organic Farms Road Tours Project Lead – Conscious Kitchen, Turning Green

April 2025-June 2025

- Connected local organic farmers in California with Conscious Kitchen to create a farm-to-table program for public schools
- Coordinated weekly check-ins for progress updates and weekly task lists
- Led outreach to organic farm stakeholders including sustainability university departments, agriculture committee members, farm to table chefs, journalists, etc.

Mirra Chinta, Emory University | Atlanta, GA

E-mail: mirrachinta77@gmail.com | Phone: 206-928-1575 | LinkedIn: [linkedin.com/in/mirrac](https://www.linkedin.com/in/mirrac)

- Collected and cleaned data, drafted communications for organic farms in Santa Barbara and San Joaquin
- Led quality control of data collection for Lassen, Tehama, Plumas, Glenn, and Sierra Counties using R
- Mapped the Bay Area, highlighting the top farms in each county and their proximity to schools
- Mapped 152 organic strawberry farms in relation to California school districts using ArcGIS

Medical Data Specialist – All4Cure

Nov 2024-Present

- Worked on the data side for a knowledge sharing platform to empower decision making for multiple myeloma patients and advise oncologists
- Review multiple myeloma patient electronic medical records in EMOL and Sharefile
- Extract and analyze 500+ clinical biomarkers from records and classify myeloma stages and risk
- Create dashboards with infographics of patient treatment timelines and labs
- Summarize and present patient history summaries outlining their timeline from diagnosis to current treatment at companywide biweekly patient rounds meetings
- Assess quality of new AI program that pulls biomarkers from scanned records
- Responsible for updating myeloma patients for Dr. Sibel Blau to ensure records were updated before upcoming appointments she had with these patients.

Research Assistant – Open Hand Atlanta

Sept 2024 – October 2025

- Supported free nutrition education classes across Georgia
- Processed and cleaned participant survey data from 12 nutrition classes using SAS and R; produced site reports in Canva for partner organizations evaluating these classes
- Collected baseline and endline biometrics using REDCap
- Designed surveys on nutrition education classes for children and teen participants
- Developed the PRx annual report, analyzed 360 survey responses in R and created figures related to behavioral changes in diet, confidence in food procurement, and demographics

Research Assistant – Northwest Center for Public Health Practice

Jan 2021 – June 2024

- Developed dashboards displaying differences in social determinants of health between rural and urban counties across the Pacific Northwest.
- Managed data cleaning and merging for county level public health research for four states in the Pacific Northwest; created data visualization displays and training materials in Tableau for the Share Northwest Project.

Volunteer — Children's Environmental Health Network

- Mapped childcare centers affected by 2024 and 2025 California wildfires using ArcGIS
